Nelson Laboratories Breaks Ground On New Building

Salt Lake City, UT- Nelson Laboratories, Inc. officially broke ground on a three-story, 48,000-square-foot addition on Monday, July 14, 2008 at 3:30 p.m. The new building will house space for administrative staff, along with the biocompatibility, microbiology and pharmaceutical laboratory departments. The existing space in the company's current building will be used for expansion for all twelve laboratory departments.

For the past several years, Nelson Laboratories has experienced significant

growth. "This new building will provide expansion space for our growing business, and will allow us to continue to offer the high standard of service that our clients have come to expect," says Jeffery R. Nelson, President/CEO of Nelson Laboratories. "We will be expanding the space dedicated to testing in our existing building to better utilize the infrastructure and engineering of this unique facility. The new building will provide two floors of office space for relocation of our administrative functions, thereby allowing us to expand many of our laboratory areas in the existing building and manage our costs."

Completion of the new building is expected to take 13 months. "With the continued growth of the medical device, pharmaceutical and dietary supplement industries, we need to be in a position to grow with our client partners" says Nelson.

Several guests were on hand to participate in the event, including Russ Wall, Mayor of Taylorsville, Utah; Joe Romero, John Kemp and Forrest McNabb of Big D Construction, Joe Linton of Joseph Linton Architect and Rob Cottle and Joel Bringhurst of Babcock Design.

Nelson Laboratories, Inc. is a contract microbiology laboratory that serves the medical device, pharmaceutical and dietary supplement industries. Nelson Laboratories was established in 1985 and has been at its current location of 6280 S. Redwood Rd. Taylorsville, UT since 1994. The original facility was a 24,000 sq. ft. building which was expanded to 62,000 sq. ft. in 2001.
